

**Notice to Sony α77 and α65 owners using Sigma's Sony fitting lenses**

2011.10.14

After thorough investigation, we have ascertained that auto focusing does not work properly when some Sony fitting Sigma lenses are used with Sony α77 and α65 interchangeable lens digital cameras. To overcome this, we will be supplying a free update to our customers. This phenomenon will only occur with the combination of any lenses listed below and the Sony α77 or α65. Future production of Sigma lenses for Sony fitting will be fully compatible with these cameras.

We deeply apologize for any inconvenience caused to our customers.

**[Phenomenon]**

When shooting with a Sony α77 or α65 camera, auto focusing does not work properly.

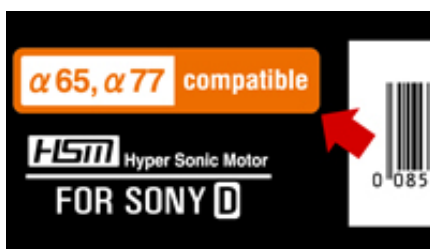

**[Lenses requiring the modification]**

10-20mm F3.5 EX DC HSM	17-50mm F2.8 EX DC OS HSM
