

## Wide shooting coverage SIGMA SD15 TWIN ZOOM KIT

2011.7.8

The Sigma Corporation is pleased to announce the new release of the "SIGMA SD15 TWIN ZOOM KIT" which comprises the SD15 digital single lens reflex camera, a SIGMA 18-50mm F2.8-4.5 DC OS HSM and a SIGMA 50-200mm F4-5.6 DC OS HSM as a set. This new Twin zoom kit will be available from July 15<sup>th</sup>.

The SIGMA SD15 is a digital single lens reflex camera which incorporates a 14 mega pixel X3 direct image sensor that captures fully the three basic colors of light – red, green and blue – at every pixel location over three layers. As it principally does not produce false colors, a low-pass filter is not required ensuring sharp and more realistic images with extraordinary detail.

By using this SIGMA SD15 with these two optical stabilized lenses - the SIGMA 18-50mm F2.8-4.5 DC OS HSM standard zoom and SIGMA 50-200mm F4-5.6 DC OS HSM telephoto zoom, a wide shooting coverage from wide-angle to telephoto is possible.

### **[SIGMA SD15 TWIN ZOOM KIT Product Information]**

Content : SD15 + SIGMA 18-50mm F2.8-4.5 DC OS HSM + SIGMA 50-200mm F4-5.6 DC OS HSM

Barcode No. : 00-85126-92816-2

### **[Characteristics of each lens]**

#### **SIGMA 18-50mm F2.8-4.5 DC OS HSM**

This standard zoom lens is equipped with approximately 4 stops OS (Optical Stabilizer) function. The lens offers a large aperture of F2.8 at the 18mm focal length. Together with the OS function, it ensures convenient handheld photography even in low light such as indoors or at dusk.

#### **SIGMA 50-200mm F4-5.6 DC OS HSM**

This compact telephoto zoom lens is equipped with approximately 4 stops OS (Optical Stabilizer). The small and light construction ensures great portability and easy handheld telephotography.
